Summary

Full Stack Web Developer with a recently earned Bootcamp certificate in Full stack Web Development, and a professional background in Market Research. Bringing a passion for learning and architecting modern web applications using JavaScript, React and MERN stack technologies. Effective team player with strong communication skills, thrives on experimenting with the latest UI trends, techniques and technological frameworks. Known to have a creative mind and problem solving abilities, and seeking to leverage this to design innovative, dynamic and responsive interfaces that address modern application needs.

Technical Skills

Languages: HTML, CSS, JavaScript, jQuery, Bootstrap

Applications/frameworks/libraries: React, Node.js, Express, MongoDB, NoSQL, MySQL, MVC Framework, Heroku

Version control systems/platforms: Fluency with Git version control, Github

- Ability to dynamically configure full stack web applications using Handlebars.
 - Solid understanding of data structures using SQL and NoSQL databases, and the Model View Controller framework.
 - Experience with and understanding of developing RESTful APIs using JSON.
 - Understanding of open source environments.
-

Projects

1. Dream Home | Github: <https://bit.ly/3dK0Z2J> |

Deployed Project: <https://bit.ly/2T93X7E>

- Designed to simplify house hunting process by rendering a list of relevant property listings and computing the travel time between the users' work address and the property.
- Core responsibilities: UI/UX design, JavaScript to retrieve and render API data.
- Technologies used: JavaScript / jQuery, HTML, CSS, Domain API, Distance Matrix API, Materialize CSS.

2. MyStock Pal | Github: <https://bit.ly/3kh7igX> |

Deployed Project: <https://bit.ly/3jgrNsO>

- A finance application built for the novice trader to add stocks to their watchlist, buy and sell stocks and read the latest market news.
- Core responsibilities: Third party APIs, HTML rendering with handlebars.
- Technologies used: JavaScript, HTML, CSS, MySQL, Node.js, Express, Express Handlebars, Sequelize, Unirest, Passport, Sessions, Bootstrap, Yahoo Finance API, Morningstar API.

3. Revita U | Github: <https://bit.ly/3dR3bFN> |

Deployed Project: <https://bit.ly/3kmmbyo>

- A food substitution application designed with the health conscious consumer in mind that encourages users to swap out unhealthy foods for healthier alternatives, and allowing them to search for recipes by ingredient.
- Core responsibilities: Entire application - individual project.
- Technologies used: MERN Stack, MongoDB, JavaScript, HTML, CSS, Passport.js, Bcrypt.js, Sessions, Semantic UI, Material UI, Edamam API.

Experience

The Interpreters, Richmond, VIC

Panel Manager / Insights Analyst

Jan 2019 - September 2020

- Recognised by managers for having excellent design and creativity skills - applied in the design of emails using HTML coding, and developing a clean and modern community website for Australian mothers using Wix.
- Commended among staff for having strong customer skills and committed to making their experience with the online community seamless and positive, answering promptly and effectively to 45 member inquiries per week.
- Prepared weekly reports for managers on the overall panel health/ numbers such as total and verified members, source of recruitment and levels of engagement which was formatted effectively.
- Developed and presented a new engagement strategy to the team and partnering high level managers based in New Zealand, which resulted in a 150% growth in member numbers and actively higher levels of community engagement. This in turn increased the quality and robustness of our research with brands due to higher member numbers.

Education

Full Stack Web Development Certificate

Monash University | May - Oct 2020

A 24-week intensive Bootcamp course that provides the technical programming skills to build dynamic end-to-end web applications using HTML5, CSS, JavaScript, JQuery, Bootstrap, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
