**MyStock Pal** | Github: [Access](#) |  
**Deployed Project:** [Access](#)

- A finance application built for the novice trader to add stocks to their watchlist, buy and sell stocks and read the latest market news.
  - Core responsibilities: API data retrieval, HTML rendering using handlebars
  - Technologies used: Javascript, HTML, CSS, MySQL, Node.js, Express, Express Handlebars, Sequelize, Unirest, Passport, Sessions, Bootstrap, Yahoo Finance API, Morningstar API
- 

## Experience

**The Interpreters**, Richmond, VIC  
*Panel Manager / Insights Analyst*  
Jan 2019 - Present

- Recognised by managers for having excellent design and creativity skills - applied in the design of emails using HTML coding, as well as the development of a clean and modern community website using Wix.
- Commended among staff for having strong customer skills and committed to making their experience with the online community seamless and positive, answering promptly and effectively to 45 member inquiries per week.
- Prepared weekly reports for managers on the overall panel health/ numbers such as total and verified members, source of recruitment and levels of engagement which was formatted effectively.

- Developed and presented a new engagement strategy to the team and partnering high level managers based in New Zealand, which resulted in a 150% growth in member numbers and actively higher levels of community engagement. This in turn increased the quality and robustness of our research with brands due to higher member numbers.

## **Education**

### **Full Stack Web Development Certificate**

*Monash University | May - Oct 2020*

A 24-week intensive Bootcamp course that provides the technical programming skills to build dynamic end-to-end web applications using HTML5, CSS, Javascript, JQuery, Bootstrap, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
